Red Rougebar

Purpose: Shine & Finish

Red rougebar Originally developed for buffing, fine and precious metals like Gold,silver,steering,platinum to produce a brilliant, high lustrous finish.

Rouge Ujala AA

Purpose: Superior shine & finish

Superior quality compare to red rougebar popularly for all precious metals but highly recommended for those industries which indulge in Faucets, hardware accessories, decorative showpieces, utensils etc. made of brass and copper.

Green Rougebar

Purpose: Extreme shine & finish

Best in class,used for extremely fine buffing jobs on all classes of metals.An excellent choice where a precise and mirror finish is desired and all rounder product for all precious and soft metals.

Red luster

Purpose: Polish

Buffing Compound Used with buff, it is the first step in finishing distressed metals. Used for coarse buffing to remove scratches, rust, corrosion or to de-burr stainless steel,brass,zinc,copper,aluminium and other metals.

Yellow luster

Purpose: Polish

Widely used for grinding and polishing alloy, aluminum, copper, iron and zinc. It also works well for sanding, rough polishing and pittings removal of stainless steel and stainless iron.

Pink Bar

Purpose: Cutting

Experience superior scratch removal with this premium Prepolish compound. Designed for use in automated polishing machines and manually operated, it effectively tackles challenging scratches on Stainless Steel pipes, stainless utensils and other S.S products to ensuring a flawless surface preparation for achieving a deep, lustrous finish on metals.

Black

Purpose: Cutting

This stainless steel polishing compound bar is used for first-stage polishing and cutting of stainless steel, steel, iron and other hard metals, compound bar works well with sisal buffing wheels, treated cotton buffing wheels and other buffing wheels.

Blue Bar

Purpose: Shine & finish

Great for polishing, cleaning, and restoring ALUMINUM OR STAINLESS ,nickel/chrome plates.This compound provides unmatched polish and shine to jewelry, non-ferrous metals also which provide bluish shine and finishing.

Golden White

Purpose: Shine & finish

All Purpose polishing compound is our most versatile compound and can be used on all materials including plastics & acrylics. White rouge can be used for achieving an extremely high luster finish on hard metal surfaces as well as removing extremely minor imperfections on soft metals.

R.R White

Purpose: Polish

Extensive selection of solid polishing compounds this is suitable for iron and iron products. Being experts in industrial cleaning of iron and other metals which leads to accomplish the desired surface polishing by cut down unwanted marks and scratches.

White AA

Purpose: Cutting

Use our White AA Buffing Compound for light cutting action and coloring on most metals. It removes the scratches left by Stainless or Tripoli compounds, and brings out the true color as it produces a brilliant shine help to produces a brilliant mirror-like finish on all metals as the final step before plating.

Bakolite grey

Purpose: Polish & finish

This compound is specially formulated to polish products made from bakelite. Bakelite is a thermosetting plastic, specifically a phenol-formaldehyde resin, known for its excellent electrical insulation, heat resistance, and chemical resistance like pressure cooker handles and other products.

Mombar/waxbar

Purpose: Polish & finish

Compound is formulated and made to be used with cotton buffing wheels and felt buffs to produce a fine finish. Especially good for producing a high luster on wood and painted surfaces majorly used by furniture manufactures.

Chrome greenbar

Purpose: Shine & finish

Universally used polish for Consistent sun like finish which ensures less consumption with fast cutting action to shine all precious metal and chrome plated articles.
